Additional Information

Investment Objective

- The investment objective of the Fund is to generate positive total returns over the long term and to preserve capital. The Fund will primarily invest in debt and income producing instruments of governments, corporations and financial institutions in the developed world as well as derivative contracts for investment or hedging purposes.

Distributions

- The Fund has a policy to make distributions quarterly at a rate determined from time to time by the Manager. These distributions are not guaranteed and may change at any time at our discretion. The Fund will also distribute, in respect of each taxation year, any net income and net realized capital gains in excess of the quarterly distributions at the end of each taxation year (normally December 31), or at such other times as may be determined by the Manager. If the quarterly distributions exceed the Fund's net income and net realized capital gains for the year, a portion of the Fund's distributions to unitholders may represent return of capital.

Management Fee

- The Manager receives a management fee payable by the Fund for providing its services to the Fund. The management fee varies for each series of units. The management fee is calculated and accrued daily based on a percentage of the NAV of the series of units of the Fund, plus applicable taxes, and is payable on the last day of each calendar month.
