

## The Evolution of Fixed Income.

A bond fund with engineered advantages that give us a performance edge.

Our objective is to get investors better outcomes from their fixed income.

Our edge comes from having more tools to generate returns and manage downside risks.

The result is a core fixed-income product that seeks to outperform traditional bond funds.

## Our Methodology.

### Core Portfolio.

We begin by constructing a portfolio of corporate bonds based on valuations and opportunities in credit. Our advantage is our ability to isolate the value in credit markets independent of interest rate exposures, which are managed separately.

### Yield Enhancement.

We enhance the portfolio yield by adding a layer of exposure to high-quality, investment-grade credit. This generates more income and return potential without sacrificing quality, liquidity, or transparency.

### Duration Management.

We actively manage interest rate exposures in a band of 2-6y. Our edge is having the tools to nimbly adjust portfolio duration and surgically manage exposures across yield curves.

### Tactical Trading.

We seek excess returns through trading strategies that capitalize on the structural inefficiencies within bond markets.

## Investment Team.

**Brian D'Costa**  
CFA MBA  
Founding Partner.  
Chief Strategy  
& Risk Officer

**Greg Jeffs**  
CFA  
Founding Partner.  
Chief Investment Officer

**Raj Tandon**  
MA  
Founding Partner.  
President

**Alexander Schwiersch**  
CFA  
Partner.  
Senior Portfolio Manager

**Chris Wallbank**  
CFA  
Senior  
Portfolio Manager

**Riley Pan**  
CFA MFin  
Associate  
Portfolio Manager

## Portfolio Breakdown

## Key Metrics

| Portfolio Yield | Interest Rate Duration | Average Term | CR01   | Leverage |
|-----------------|------------------------|--------------|--------|----------|
| 4.1%            | 4.4 yrs                | 2.7 yrs      | 4.9bps | 2.1x     |

Portfolio Yield is the weighted average aggregate yield net of borrow cost; IR Duration is an estimate of portfolio sensitivity to 1% change in interest rates; Average Term is weighted average term to maturity of long positions; CR01 is an estimate of portfolio sensitivity for a one basis point change in credit spreads across all credit positions; Leverage based on short positions and borrowed cash as per National Instrument 81-102.

## Long Exposures

## Fund Details

|                 |                                    |

This document is not, and does not constitute, an offer to sell or the solicitation, invitation or recommendation to purchase any securities. The information provided may be subject to change and Algonquin does not undertake any obligation to announce updates or changes to the information presented in this document. Algonquin Fixed Income 2.0 Fund is an Alternative Mutual Fund. Investors should read the Simplified Prospectus, Annual Information Form, and Fund Facts Documents and consult their registered investment dealer before making an investment decision. Commissions, trailing commissions, management fees and operating expenses all may be associated with mutual fund investments. An Alternative Mutual Fund is not guaranteed, its value changes frequently and its past performance is not indicative of future performance and may not be repeated. Payment of quarterly distributions is not guaranteed and paid at the discretion of the manager, therefore, it may vary from period to period and does not infer fund performance or rate of return.

CR01 represents the estimated impact on the Net Asset Value expressed in basis points for a one basis point change in credit spreads across all credit positions. Total Exposure/Leverage is calculated as the total market value of all positions that are not hedges divided by the Net Asset Value. Net Credit Leverage is calculated by converting the credit exposure into a 5y duration equivalent notional which is then divided by the Net Asset Value.
